

1. (Currently amended) A computer-implemented method of performing data mining on an individual basis comprising:
monitoring ~~an individual's use~~ web transaction patterns of an individual by a computer of the individual;
creating ~~an~~ individual transaction profile data based on said monitoring by the computer; and
performing ~~tasks~~ a transaction automatically in accordance with ~~an~~ the individual's request and based on the individual transaction profile data by the computer.

2. (Currently amended) The method as claimed in claim 1 wherein the ~~request~~ transaction includes at least one of grocery shopping, travel planning, and financial ~~transactions~~ transaction.

3. (Currently amended) The method as claimed in claim 1, further comprising analyzing the individual's ~~use~~ web transaction patterns by the computer.

4-5. (Cancelled)

6. (Currently amended) The method as claimed in claim 1, wherein the individual transaction profile data includes individual specific characteristics.

7. (Currently amended) The method as claimed in claim 6, wherein the individual-specific characteristics include at least one of physical characteristics, financial characteristics, and identifying characteristics.

8. (Currently amended) The method as claimed in claim 1 wherein the individual transaction profile data includes at least one of shopping transaction preferences, ~~browsing preferences,~~ financial transaction preferences, and travel transaction preferences.

9. (Cancelled).

10. (Withdrawn) A computer system for performing data mining on an individual basis comprising:

a processor for receiving and transmitting data; and
a memory coupled to said processor, said memory having stored therein a sequences of instructions which, when executed by one of said one or more processors, cause one of said processor to monitor an individual's use patterns; create an individual profile data based on said monitoring; and perform tasks automatically in accordance with an individual's request and based on the individual data profile.

11. (Withdrawn) The computer system as claimed in claim 10 wherein said memory further comprises sequences of instructions which, when executed by one of said processor, cause said processor to analyze the individual's use pattern.

12. (Withdrawn) The computer system as claimed in claim 10 wherein the individual's use patterns include the individual's web use.

13. (Withdrawn) The computer system as claimed in claim 10 wherein the individual profile data includes at least one of shopping preferences, browsing preferences, financial preferences, and travel preferences.

14. (Withdrawn) The computer system as claimed in claim 10, wherein the request includes at least one of grocery shopping, travel planning, and financial transactions.

15. (Withdrawn) The computer system as claimed in claim 12 wherein the web use includes at least one of web browsing, web searching, and web shopping.

16. (Withdrawn) The computer system as claimed in claim 10 wherein the individual profile data includes individual specific characteristics.

17. (Withdrawn) The computer system as claimed in claim 16 wherein the individual-specific characteristics include at least one of physical characteristics, financial characteristics, and identifying characteristics.
